Power-Wiz Electro Limited is involved in Solar Solutions, Full Turnkey Telecommunication Works, Electrical, Fiber, Construction and Water Supply Projects. Power-Wiz Electro Limited offers a broad spectrum of engineering based projects. Since inception Power wiz Electro LTD has completed a number of projects which is the hallmark of our success. The company believes that every business is responsible for achieving good environmental practices and they should be operating in a sustainable manner. We are therefore committed to reduce our negative environmental impact and continually improve our environment performance as an integral and fundamental part for our business strategies and operating methods. Promoting sustainable management and utilization of resources is our priority.

Our policy ensures the following on environmental aspect:

- Minimize our waste and then reduce the recycle as much of it as possible. And ensure that those which cannot be reused or recycled are disposed in a way that it will not pose negative impact to the environment.
- Applying and maintain an environmental management plan that identifies, assesses and effectively controls environmental risks to the business and community.
- Integrate environmental considerations into all aspects of the company's activities such as Renewable Energy, Telecommunication Works and Engineering Infrastructure.
- Wholly support and comply with legal and other requirements of current environmental legislation and code of practice.
- EHS Manager will ensure the implementation of this policy by putting plans and procedure in place and enforce them to all employees who will ensure that all their activities are in a manner that they do not affect the environment negatively.
- Conserving natural resources and reducing the environmental impacts on waste generation and emissions to air, water and land through strategies focusing on refuse, reduce, reuse, repurpose and recycle of waste.
- The policy to be reviewed and updated every year

As senior management team we lead the company in this commitment and encourage employees, contractors and stakeholders to do the same; so as to create a culture of zero harm, zero deficiencies and zero damage.

Approval
